

## **February 19<sup>th</sup> 2025 - Notes to the Community - 2:33 p.m.**

Hello, Everyone,

This is an update from the "Notes to the Community" that was sent out earlier [ 9:54 a.m. ].

Below is a message received last night from Envera. We assumed that it had been sent out to the entire Community. Apparently, it was not. The message explains at least in part what happened to their system and why our entrance gates are not functioning, and have not been for a week. Obviously, their system has been "hacked".

Due to this, the system is unable to "read" or identify the stickers that we have on our vehicles and thus will not open the entrance gates. The exit gates don't require a sticker, or any identification to allow egress, thus that part of the system was not impacted.

Please read the message below. As mentioned, the thought was that everyone had received it. Apologies for any confusion that you may have had in reading the "Notes to the Community" of earlier today.

Again, more information will be forthcoming as soon as we receive it!

Thanks,

**Ron Mc Ewan, Board President**  
**Bell Tower Park Property Owners Association**
